

## INSTALLATION GUIDE

Thank you for your purchase of TetherTies®.

We think you'll find them useful, and your colleagues will appreciate having adapters and computer peripherals close at hand.

**1** Slip the loop from one end of your TetherTies® over the end of the adapter, cable, or other item you'd like to secure.

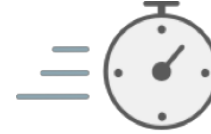

**2** Slide the metal ring sleeve up tight on the adapter (or other item), and crimp the metal sleeve securely using the enclosed crimping tool.

**3** Slip the loop from the other end of your TetherTies® over the end of the second item which you'd like to secure.

**4** Slide the metal ring sleeve up tight on the second item, and crimp the metal sleeve securely using the enclosed crimping tool.

NOTE ON STEPS #2 and #4: Use a firm grip with the enclosed installation tool to fully crimp the metal sleeves shut. This will ensure items are secured to the TetherTies® cable tether.
